

Job title	Frontend Developer (Design-Focused)
Reports to	Senior Software Developer

Role Summary

We are looking for a design-driven Frontend Developer who cares deeply about UI quality, visual polish, and user experience. This role blends UI/UX design in Figma with frontend development using React and Next.js, giving you real ownership over how our product looks and feels.

If you obsess over spacing, typography, clean layouts, and pixel-perfect execution — this role is for

you. Key Responsibilities

- Design and build modern user interfaces — **create UI/UX designs in Figma and implement them as responsive, pixel-perfect frontend UIs**
- Translate product ideas and requirements into **clean, intuitive designs and high-quality frontend code** · Build and maintain **reusable UI components** with consistent design patterns
- Ensure **responsiveness, accessibility, and cross-browser compatibility**
- Work with REST APIs — handle data fetching, loading states, and error scenarios gracefully · Maintain a high bar for **UI polish, performance, and overall user experience**

Collaborate closely with product and backend teams to ship high-quality features

Required Skills

Design

- Strong visual design sense: **spacing, alignment, typography, color harmony, hierarchy, and consistency** · Ability to **design interfaces independently**.
- Hands-on experience with **Figma**, including:
 - Auto-layout
 - Components & variants
 - Prototypes
 - Design systems

Frontend Development

- Strong **HTML5 & CSS3** fundamentals
- Excellent CSS skills: **Flexbox, Grid, responsive layouts, animations**
- Experience with **React** and **Next.js**
- Solid understanding of **modern JavaScript**

- Attention to detail in implementing **pixel-perfect UIs**
- Experience working with **REST APIs**

Nice to Have

- Basic understanding of **accessibility (a11y) best practices**
- Experience maintaining or contributing to a **design system**
- Interest in product thinking and user experience
- Familiarity with performance optimization techniques

Experience Level

- Fresher to 1 year of experience
- Strong portfolio or work samples (Figma designs, frontend projects, or both) are highly valued

What We Offer

- Opportunity to **own the UI/UX** of a real product
- A design-first engineering culture that values **quality and craftsmanship**
- Fast learning, high responsibility, and real impact from day one
- Collaborative startup environment with room to grow
- Freedom to shape design systems, components, and frontend standards
