

GRACE JACKSON

React Developer | Full Stack | Financial Applications

+1-(234)-555-1234 @ Email linkedin.com Los Angeles, California

SUMMARY

With over 5 years of experience in developing scalable financial applications, brings expertise in React.js and Node.js, augmented by strong proficiency in JavaScript, HTML, and CSS. Known for delivering high-quality code while fostering cross-functional collaboration. Key achievement includes leading a project that improved application performance by 35% through code optimization.

EXPERIENCE

React Full Stack Developer

FinTech Innovations

- 03/2026 - Present Remote
- Led development of a landmark web application utilizing React.js, Node.js, and AWS, increasing client operations efficiency by 40%.
- Collaborated with product managers and UX/UI designers to ensure alignment on project objectives for financial service applications.
- Facilitated successful deployment cycles by integrating RESTful APIs and optimizing response times by 30%.
- Maintained code quality through rigorous testing and debugging, reducing bug-related incidents by 25%.
- Delivered technical guidance and mentorship to junior developers, promoting an environment of learning and growth.

Senior Software Engineer

BlueWave Technologies

- 05/2023 - 02/2026 Los Angeles, CA
- Achieved a 35% improvement in application performance through codebase optimization and leveraging containerization tools like Docker.
- Integrated Redux workflows into React projects for scalable state management, enhancing user experience by 20%.
- Collaborated closely with backend developers ensuring seamless integration and advancement of API features.
- Cultivated a collaborative team environment, resulting in a project delivery time decrease by 15%.

Web Development Engineer

Pulse Softwares

- 06/2021 - 04/2023 Santa Monica, CA
- Developed key features for customer-facing applications using React and Node, increasing user satisfaction scores by 28%.
- Enhanced application security and stability through code reviews and best practices implementation, reducing vulnerabilities by 22%.
- Integrated continuous integration/continuous deployment (CI/CD) pipelines, accelerating deployment cycles by 40%.
- Successfully managed stakeholder communication to ensure project goals consistently exceeded expectations.

EDUCATION

Bachelor of Science in Computer Science

University of California, Los Angeles

- 01/2017 - 01/2021 Los Angeles, CA

PROJECTS

Microfinance Portal

Developed a comprehensive microfinance web portal for emerging markets. Implemented using React.js and Node.js. GitHub: <https://github.com/gracejackson/microfinance-portal>

Cryptocurrency Trading App

Contributed to the development of a real-time cryptocurrency trading application. Focused on front-end scalability. GitHub: <https://github.com/gracejackson/crypto-trading-app>

KEY ACHIEVEMENTS

-  **Improved Application Performance**
Facilitated a 35% improvement in application performance by identifying and optimizing inefficient code areas at BlueWave Technologies.
-  **Enhanced Security Protocols**
Reduced security vulnerabilities by 22% through rigorous testing and integration of advanced security measures at Pulse Softwares.
-  **Maximized Operational Efficiency**
Increased client operations efficiency by 40%, leading a major project involving AWS integration at FinTech Innovations.
